Ontario Soccer

The North Scarborough Soccer Club supports and is fully committed to Long Term Player Development and CS Strategy (Wellness to World Cup).

North Scarborough Soccer Club Skill Development Program

Many children start playing "competitive" soccer at a very young age. Some of these children never get to fully develop their skills to their highest potential because focus is sometimes placed on winning games rather than developing proper soccer techniques, confidence and creativity. When young player are taught proper footwork drills, skill techniques and how to be an effective one on one player, their enjoyment of the game will increase dramatically.

To this end, North Scarborough Soccer club operates the “House of Champions” Soccer Skill Development program. The Soccer Skill Development program will focus on individual player skill development techniques - passing, dribbling, fast footwork, 1v1 moves. Players are allowed to make mistakes and grow from them.

All training sessions will adhere to the Ontario Soccer Long Term Player Development Program structure.

On Behalf of the Board of Directors

Byron McCormack
President
